Freudianism and Science, Mysticism

By Jose Revueltas (2024-5)

I. Freud and Such Things as Life

In fact then Freud is arguing for a free individual and free living person and sounds even like anarchism and Marxism and touches of science and fine art.

II. Sirohi - like a Freudian

In fact Sirohi keeps sounding Freudian and posits things – “When we talk around the point and keep talking we get a prediction as well, that for a few days I will not do well, and do well later.” This then means in Argentine history he meant in one elliptical reference, how in fact people work on their files and reports and then work on Marxism and Freud and recover from an illness which is simply how life is utopianism.

III. Some Mysticism

That in fact it is an elipses the point, that we live happily and even create moments and create art and artistic writings.

IV. Illuminations

I mean this illuminates a life as going to utopian heights, I mean it is anarchism and Marxism, previously published with a Freudian literary figurative, that we are always this simple infinity and like astronomers.
